This book tells the story of how John Egan gradually overcame the odds and, piece by piece, rebuilt this great company, winning over the workforce, the overseas dealers and, most important of all, the customers. Working with Margaret Thatcher and her Government, Egan and his team of managers overcame every obstacle, every set-back, every challenge. Again and again, it looked impossible. Yet using innovative techniques, intelligence, eloquence, openness, motor racing and much more, they saved this most charismatic company which has created some of the finest and most loved motor cars of all time. Modifications are suggested for those wishing to bring performance and reliability up to more modern standards. Fault-finding charts, cross referenced to the appropriate pages in the book, are provided throughout.

have the most powerful forced-induction engine of any production Jaguar road car and it had a lot riding on its success. It was the XK8 - a sleek, purposeful grand tourer in the Jaguar tradition. Graham Robson, one-time Jaguar apprentice and a motoring historian with several other Jaguar books to his credit, tells the story of one of the twentieth century's most beautiful sports car, from its conception to the end of the line for both it and the factory it was built in.

Associationism and the Literary Imagination traces the influence of empirical philosophy and associationist psychology on theories of literary creativity and on the experience of reading literature. It runs from David Hume's Treatise of Human Nature in 1739 to the works of major literary critics of the twentieth century, such as I.A. Richards, W.K. Wimsatt and Northrop Frye. Cairns Craig explores the ways in which associationist conceptions of literature gave rise to some of the key transformations in British writing between the romantic and modernist periods. In particular, he analyses the ways in which authors' conceptions of the form of their readers' aesthetic experience led to radical developments in literary style, from the fragmentary narrative of Sterne's Tristram Shandy in 1760 to Virginia Woolf's experiments in the rendering of characters' consciousness in the 1920s; and from

Detailed analyses are offered of the ways in which a wide variety of major British writers, including Scott, Lady Morgan, Dickens, Tennyson, Hardy, Yeats, Joyce and Woolf developed their literary techniques on the basis of associationist conceptions of the mind, and of how modern literary criticism - from Arthur Symons to Roland Barthes - is founded on associationist principles. *Associationism and the Literary Imagination* relocates the traditions of British writing since the eighteenth century within the neglected context of its native empirical philosophy, and reveals how many of the issues assumed to be products of 'postmodern' or 'deconstructive' theory have long been foregrounded and debated within the traditions of British empiricism. This is a work which provides a radical new perspective on the history of literature in Britain and Ireland and challenges many of the assumptions of contemporary theoretical debate about the
