Considering philosophical theories of punishment in light of both abstract arguments and factual evidence about the effects of punishing offenders, this book links the moral justification of punishment by the state to more general issues concerning the nature of moral disagreements and our obligations to obey the law. Ten applies his discussion to problems in the punishment of a variety of offenders--the dangerously mentally ill, Nazi war criminals, "negligent" drivers, rapists, and others--and considers several related questions about crime and

A few words about Dostoevsky himself may help the English reader to understand his work. Dostoevsky was the son of a doctor. His parents were very hard-working and deeply religious people, but so poor that they lived with their five children in only two rooms. The father and mother spent their evenings in reading aloud to their children, generally from books of a serious character. Though always sickly and delicate Dostoevsky came out third in the final examination of the Petersburg school of Engineering. There he had already begun his first work, "Poor Folk." This story was published by the poet Nekrassov in his review and was received with acclamations. The shy, unknown youth found himself instantly

with guilt over the crime that he has committed and begins to worry excessively about being discovered. His guilt begins to manifest itself in physical ways. He falls into a feverish state and his actions grow increasingly strange almost as if he subconsciously wishes to be discovered. As suspicion begins to mount towards him, he is ultimately faced with the decision as to how he can atone for the heinous crime that he has committed, for it is only through this atonement that he may achieve some psychological relief. As is common with Dostoyevsky's work, the author brilliantly explores the psychology of his characters, providing the reader with a deeper understanding of the motivations and conflicts that are central to the human condition. First published in 1866, "Crime and Punishment" is one of Fyodor Dostoyevsky's most famous novels, and to this day is regarded as one of the true

who has become a cult figure. Born in 1926 in France, over the course of his life he dabbled in drugs, politics, and the Paris SM scene, all whilst striving to understand the deep concepts of identity, knowledge, and power. From aesthetics to the penal system; from madness and civilisation to avant-garde literature, Foucault was happy to reject old models of thinking and replace them with versions that are still widely debated today. A major influence on Queer Theory and gender studies (he was openly gay and died of an AIDS-related illness in 1984), he also wrote on architecture, history, law, medicine, literature, politics and of course philosophy, and even managed a best-seller in France on a book dedicated to the history of systems of thought. Because of the complexity of his arguments, people trying to come to terms with his work have desperately sought introductory material

Reprint of the fourth edition, which contains an additional text attributed to Voltaire. Originally published anonymously in 1764, *Dei Delitti e Delle Pene* was the first systematic study of the principles of crime and punishment. Infused with the spirit of the Enlightenment, its advocacy of crime prevention and the abolition of torture and capital punishment marked a significant advance in criminological thought, which had changed little since the Middle Ages. It had a profound influence on the development of criminal law in Europe and the United States.
