Current Topics in Clinical and Community Psychology, Volume 1 reviews advances in clinical and community psychology. Topics covered include theory and research in areas such as psychological assessment of intelligence, personality, and abnormal behavior; psychotherapy, broadly defined to include counseling and behavior modification; and psychophysiological and neurological determinants of personality and psychopathology. Comprised of five chapters, this volume first illustrates how reinforcement and modeling techniques can enable psychologists to function effectively as mental health consultants and agents of social

change in an institution for delinquent children. The second chapter describes a unique program designed to prevent emotional dysfunction in school children by combining effective therapeutic intervention with relevant research and evaluation. The third chapter challenges the relevance of psychological research that does not take into account the relationship between the experimenter and his subjects, and instead demonstrates the impact of experimenter self-disclosure on the responses given to psychological tests and on subjects' behavior in psychology experiments. The fourth chapter proposes a behaviorally oriented model for the assessment of positive mental health and describes a successful application of this model in the assessment of the competence of college freshmen. The final chapter relates research on human psychophysiology to problems of psychological assessment and psychotherapy that are of central concern to clinical psychologists. This book should prove useful to practicing clinical and community psychologists, graduate and undergraduate students of psychology, and members of other mental health professions.

Applying Educational Psychology in Coaching Athletes discusses how to improve coaching success and athletic performance through the application of teaching principles and theories. Delving deeper than an explanation of what athletes learn and what coaches teach, Applying Educational Psychology in Coaching Athletes offers insight into the how of athletes' learning and coaching by considering • principles of psychology that drive the emotions, motivation, expectations, self-worth, and relationships of athletes; • application of principles of psychology to the motor learning process; and • use of principles of educational psychology to improve sport expertise and coaching success. A three-time U.S. Olympic coach and veteran collegiate coach, Huber infuses his own experience in applying theories of educational psychology in working with individual athletes, as well as world-class national and international teams. With an engaging presentation and strong practical applications, Huber assists coaching students and practicing coaches in utilizing educational psychology as a platform for improving coaching skills. Applying Educational Psychology in Coaching Athletes introduces the idea of the developing coach as both teacher and learner, and how coaching principles and a strong coaching philosophy provide a foundation for effective management and decision-making. By considering the theories that drive successful coaching, developing coaches gain focus, motivation, and guidance as they learn how a thoughtful coach provides the structure and discipline to make athletes more successful on the field of play. Throughout the text, Huber focuses on how athletes learn, considering theories of motivation, behaviorism, cognition, and humanism, and the interplay between emotions and motor learning and performance. Each chapter opens with a coaching related anecdote that readers can relate to in order to highlight the significance of the theory under consideration. After careful explanation of each theory, Huber details concrete examples, guidelines, and specific applications for coaching. In addition to summary information, each chapter concludes with 'Your Coaching Toolbox,' which focuses readers on ways to incorporate their newly gained knowledge into their interactions with athletes. Applying Educational Psychology in Coaching Athletes is unmatched in its depth of insight into the teaching and learning process in sport and how to put it into practice. By examining how athletes learn and coaches teach, the text helps coaches understand how to maximize athlete performance and increase their athletic success.

'Lazere's [book] is heaven-sent and will provide a crucial link in the chain of understanding how conflicts are structured and, most importantly, how they can be rationally addressed - a healthy antidote to the scepticism that has become so pervasive in academic life.' Alan Hausman, Hunter College This innovative book addresses the need for college students to develop critical reading, writing, and thinking skills for self-defence in the contentious arena of American civic rhetoric. In a groundbreaking reconception of composition theory, it presents a comprehensive critical perspective on American public discourse and practical methods for its analysis. Exercises following the text sections and readings help students understand the ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies - such as the growing inequality of wealth in America and its impact on the finances of college students - as expressed in paired sets of readings from the political left and right. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.
