The book includes high-quality research papers presented at the International Conference on Innovative Computing and Communication (ICICC 2018), which was held at the Guru Nanak Institute of Management (GNIM), Delhi, India on 5 – 6 May 2018. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Challenging the ‘ success story ’ of curiosity from

Online Library Network Ysis By Ravish Singh

original sin to intellectual virtue, this study uses an innovative methodological approach to the history of ideas as a non-teleological neural network based on current research in information technology and neurophysiology. The network offers a dynamic alternative to the 'development' of curiosity within the progress-oriented mythology of the Enlightenment, emphasizing the oscillation and interaction of ideas within the processes of their construction, as well as exposing the power relations behind them. The text corpus focuses on enactments of curiosity in English literature of the 'Long' Eighteenth Century (c. 1680-1818), such as transgression of boundaries, breach of taboo, gendered curiosity, sensationalism, or

Online Library Network Ysis By Ravish Singh

academic endeavour, bringing together a variety of examples from all major genres. The Age of Curiosity contributes to current debates on a post-Foucauldian renewal of Lovejoy ' s history of ideas in Enlightenment studies, exploring both curiosity as an indispensable trait for the search of answers to the fundamental yet unresolved questions of ' identity ' or ' truth ' , and its potential as cura, the care for others and the world.

This volume constitutes the second of three parts of the refereed proceedings of the First International Conference on Computer Science and Information Technology, CCSIT 2010, held in Bangalore, India, in January 2011. The 66 revised full papers presented in

Online Library Network Ysis By Ravish Singh

this volume were carefully reviewed and selected. The papers are organized in topical sections on networks and communications; network and communications security; wireless and mobile networks.

This book gathers high-quality research papers presented at the Global AI Congress 2019, which was organized by the Institute of Engineering and Management, Kolkata, India, on 12 – 14 September 2019. Sharing contributions prepared by researchers, practitioners, developers and experts in the areas of artificial intelligence, the book covers the areas of AI for E-commerce and web applications, AI and sensors, augmented reality, big data, brain computing interfaces,

Business Studies, University of Delhi, Delhi, India, on 21-23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

As an initial attempt to understand innovation in fashion, this volume focuses on product innovations, realizing that this industry is truly an innovative sector in which diverse technologies, science, art, and

Online Library Network Ysis By Ravish Singh

tradition have been merged, synthesized, and utilized to solve the needs and concerns of the end-users. In doing so, this book categorizes product innovation into three levels—materials, style and product development—and aims to present the broader scope of innovation in the global fashion industry with the hope that other sectors can learn from these developments and be inspired.

Colonialism/Postcolonialism is a comprehensive yet accessible guide to the historical and theoretical dimensions of colonial and postcolonial studies. Ania Loomba deftly introduces and examines: key features of the ideologies and history of colonialism the relationship of colonial discourse to literature

Online Library Network Ysis By Ravish Singh

challenges to colonialism, including anticolonial discourses recent developments in postcolonial theories and histories issues of sexuality and colonialism, and the intersection of feminist and postcolonial thought debates about globalization and postcolonialism Recommended on courses across the academic disciplines and around the world, Colonialism/Postcolonialism has for some years been accepted as the essential introduction to a vibrant and politically charged area of literary and cultural study. With new coverage of emerging debates around globalization, this second edition will continue to serve as the ideal guide for students new to colonial discourse theory, postcolonial studies or postcolonial

Online Library Network Ysis By Ravish Singh

theory as well as a reference for advanced students and teachers.

This work is a comprehensive information on the indigenous bioresources of North Eastern India with the scope of bioprospecting for discovery and commercialization of new sources and products and long-term ecological balance. The exploration, conservation and sustainable utilization of bioresources of world ' s Megabiodiversity Hotspots are undeniable. North Eastern India is a recognised biodiversity hot spot where the evolutionary forces are at its optimum, making this region as centre of origin for many species. Although little bit exploratory studies have been

Online Library Network Ysis By Ravish Singh

conducted in this part of the globe but a scientific exploitation of the bioresources is almost lacking. Unscientific exploitation and overexploitation without proper knowledge of the bioresources may lead to imbalanced ecosystem of this mega diversity region. At the same time, very less exploration and exploitation will hamper biodiversity based development. Today, unscientific dramatic changes are underway in this region. Human activities are changing, degrading and destroying the bioresources in an unplanned manner. Scientific bioprospecting of the bioresources will boost the economy while ensuring conservation. This book offers comprehensive information about various levels of bioprospecting of the gene pool of this Indo-Burma

Online Library Network Ysis By Ravish Singh

Mega Biodiversity Hot Spot, the North East India, which is endowed with huge biodiversity potential for exploration and exploitation for the benefit of humankind. Also, this book highlights the less and merely explored part of the indigenous biodiversity of North East India with explanation towards their better sustainable exploitation for benefit of the people, economy and environment. The novelty of the book lies in expert coverage of the bioresources of this mega-diverse region including plants, microbes, insects etc. with provisions for their sustainable scientific utilization. This book portrays North East India as a melting pot of bioresources which are little explored and also those resources which are still to be explored.

Online Library Network Ysis By Ravish Singh

The book mainly highlights the bioprospecting approaches for North East Indian bioresources, and thus, it make itself a unique one in filling the knowledge gap that is there regarding the bioprospecting of the biodiversity of this special region on the earth. The book concludes by the ecotourism potential of this region. The target audiences for this book include biodiversity economists who are working on technology and bioresource management issues, and especially on biotechnology and biodiversity, development economists addressing the issues of bioresources in developing countries. These people may be in academia, in government, in non-governmental organizations and in private companies. The other

Online Library Network Ysis By Ravish Singh

target audiences group is policy scholars in government/public sectors who are interested in issues of biotechnology, IPRs, and biodiversity. In addition, scholars/experts in both development studies and resource management studies form another group of target audiences. Also, the book will be useful for the interaction between developed and developing nations regarding the issues of biodiversity and bioprospecting, as North Eastern India is the hub of Biodiversity.

Xenobiotic compounds including pesticides, nitrophenols, pyridine, polycyclic aromatic compounds and polychlorinated biphenyls are widely spread in environment due to anthropogenic activities. Most of

Online Library Network Ysis By Ravish Singh

them are highly toxic to living beings due to their mutagenic and carcinogenic properties. Therefore, the removal of these compounds from environment is an essential step for environmental sustainability.

Microbial remediation has emerged as an effective technology for degradation of these xenobiotic compounds as microorganisms have unique ability to utilize these compounds as their sole source of carbon and energy. The primary goal of this book is to provide detailed information of microbial degradation of many xenobiotic compounds in various microorganisms.
