Processing and Reasoning ...

Different depths of processing of a discourse can be detected on a continuum, starting from shallow levels - at which the listener constructs a mental representation of the discourse in a propositional format - up to deep levels of processing - at which the listener creates an articulated mental model of the contents of the discourse.

Conversely, mental models also play a role in the much neglected theory of discourse production, viz., as the mental point of departure of all text and talk, from which relevant information may be selected for the strategic construction of their global and local semantic structures.

Cognitive Context Models and Discourse

A mental model is an explanation of someone's thought process about how something works in the real world. It is a representation of the surrounding world,

the relationships between its various parts and a person's intuitive perception about his or her own acts and their consequences. Mental models can help shape behaviour and set an approach to solving problems and doing tasks. A mental model is a kind of internal symbol or representation of external reality, hypothesized to play a major role i

Mental model - Wikipedia

The basic idea behind situation models is that comprehension of a stretch of discourse involves the construction of a mental representation of the state of affairs denoted by that text rather than only a mental representation of the text itself.

Abstract. In this article the relevance of a sociocognitive approach to discourse is shown by presenting a new theory of context, defined as subjective participants' constructs of communicative situations, and made explicit in terms of mental models - context models - in Episodic Memory. Through a 'contextual analysis' of a fragment of one of the 'Iraq' speeches by Tony Blair in the British House of Commons, it is shown how such context models control and explain many political ...
